DIGILIN

## DALI Receiver with 3 Channel PWM Output

The LDALI-PWM-3 is a DALI receiver with three channels of PWM driven outputs for controlling constant voltage LED systems. The PWM outputs make use of Digilin's special smoothed PWM transitions software making variations in light output almost imperceptible even at low levels.

It is an ideal solution for integrating white LED strips into a DALI lighting control system, providing full dimming control or for controlling static colours in an RGB colour mixing system.

## SPECIFICATIONS

Input Voltage	12VDC - 24VDC
Input Current	6A
Communications	DALI (IEC62386)
Output Voltage	3 Channels Low Side Constant Voltage PWM
Output Current	3 x 2A (6A Total)
IP Rating	IP20
Dimensions	120.6mm x 39mm x 32mm
Weight	65g
