

WEB COLOUR

Lighting Control Interface

Web based lighting control interface

The Digilin WebColour is a web-based interface to control RGB, RGBW or multi channel LED light installations. The user can access the interface from any device that includes a modern web browser, this includes computers, laptops, smart phones, tablets, smart TVs and gaming systems.

The WebColour includes triggering options for power-up and 10 alarms that can be configured to occur on individual days, and uses NTP for accurate time keeping.

There are 2 models in the range, the PWM model which allows for direct control of the LED installation, or a DMX version which allows for control of larger installations.

SPECIFICATIONS

Supply Voltage	12VDC - 24VDC
Unloaded Current	40mA
Fuse	10A
Ethernet	10/100
DMX Output	DMX512 (Addresses 1-27)
DMX Load	0.25 Standard Devices
PWM Channels	4
PWM Output Current	2.0A per Channel (6A Max)
IP Rating	IP20
Dimensions	175mm x 80mm x 50mm
Weight	300g
