

PosiVolt

1-10V Controller

A simple and effective means to dim LED lighting

The PosiVolt Controller is the perfect solution to provide simple user control to smoothly dim LED lighting systems that require an analogue control signal (1-10V)

To the end user the PosiVolt looks and operates exactly like a standard lighting dimming plate

SPECIFICATIONS

Input Voltage	100 - 264VAC
Frequency	47-63Hz
Output Signal	1-10V Analogue
IP Rating	IP20
Dimensions	72mm x 117mm x 45mm
Weight	110g
